

We are **EXCITED** to introduce **P3@Home**.

Our new home care program is designed to make receiving top-quality care more accessible.

- ♥ **P3@Home** visits are not intended to replace primary care providers or comprehensive visits.
- ♥ Instead, **P3@Home** providers will work in **PARTNERSHIP** with primary care providers to give patients the **CARE** they need when they need it **MOST**.
- ♥ **P3@Home** providers are **AVAILABLE** to provide health services in the **COMFORT** and **PRIVACY** of the patients' home who are suffering from chronic conditions or experiencing difficulty attending traditional office visits.

Patients may **QUALIFY** if they have any of the chronic conditions below:

- > Chronic heart failure
- > Diabetes
- > High blood pressure
- > Cancer
- > Dementia
- > And more

If you have any **QUESTIONS** or to find out if your patients qualify, please reach out to **P3.Home@P3HP.org** or call **(725) 231-8000**.
